

README — Task 4 Dashboard

Task 4 — Dashboard Design

Objective

Design an interactive dashboard for business stakeholders using the provided **Sample - Superstore.csv** dataset.

Deliverables

- dashboard/index.html — interactive stakeholder dashboard
- dashboard/dashboard_data.json — aggregated dashboard data
- presentation/Task_4_Dashboard_Summary.pptx — PPT summary
- data/Sample - Superstore.csv — source dataset
- README.md — project documentation

Dataset

- Records: 9,994
- Fields: 21 original fields plus helper date fields used for analysis
- Total Sales: \$2,297,200.86
- Total Profit: \$286,397.02
- Total Orders: 5,009
- Profit Margin: 12.5%

Dashboard Features

- KPI cards: Sales, Profit, Orders and Profit Margin
- Year, Category, Region and Segment filters
- Monthly Sales and Profit trend
- Sales by Category
- Sales by Region
- Profit by Sub-Category

How to Use

1. Upload this folder to a GitHub repository.
2. Open dashboard/index.html directly, or enable **GitHub Pages** for the repository.
3. Use the filters at the top to explore the dashboard.

Business Insights

- Technology is the highest-sales and highest-profit category.
- West is the highest-sales region.
- Tables show negative profit and should be reviewed for pricing, discount and cost issues.
- Overall sales and profit increased from 2014 to 2017.

Submission

This package is prepared as the final Task 4 project copy. Upload the files/folders to a new GitHub repository as required by the task instructions.
